Acknowledgment

It gives us a great sense of pleasure to present the synopsis of the B.Tech mini-project undertaken during B. Tech III Year. This project is going to be an acknowledgment of the inspiration, drive, and technical assistance that will be contributed to it by many individuals. We owe a special debt of gratitude to Mr. Bhanu Kapoor, Technical Trainer, for providing us with an encouraging platform to develop this project, which thus helped us in shaping our abilities towards a constructive goal, and for his constant support and guidance to our work.

His sincerity, thoroughness, and perseverance have been a constant source of inspiration for us. We believe that he will shower us with all his extensively experienced ideas and insightful comments at different stages of the project & also will teach us about the latest industry-oriented technologies. We would like to acknowledge the contribution of all faculty members of the department for their kind guidance and cooperation.

ABSTRACT

The purpose of Heavens Movie is to automate the existing manual system with the help of computerized equipment and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy access and manipulation of the same. The required software and hardware are easily available and easy to work with.

The aim is to automate its existing system of retrieving data by making it more feasible through a single page. It will let user browse easily over the range of movies within a webpage and get filtered information.

The project describes how to manage for good performance and better services for the client.

INTRODUCTION

The "Heavens Movie" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and in some cases reduce the hardships faced by this existing system. Moreover, this system is designed for the particular need of the company to carry out operations smoothly and effectively.

The application is reduced as much as possible to avoid errors while entering the data. It also provides an error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus by this all, it proves it is user-friendly. Heavens Movie, as described above, can lead to an error-free, secure, reliable, and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on record keeping. Thus it will help the organization in better utilization of resources.

Every organization, whether big or small, has challenges to overcome and manage the information of Trending movies, Genre, Rating and Trailer.

Every Online Movie Portal has different Movie needs, therefore we design exclusive employee management systems that are adapted to your managerial requirements. This is designed to assist in strategic planning and will help you ensure that your organization is equipped with the right level of information and details for your future goals. Also, for those busy executives who are always on the go, our systems come with remote access features, which will allow you to manage your workforce anytime, at all times. These systems will ultimately allow you to better manage resources.

SOFTWARE REQUIREMENTS

- HTML
- CSS
- Javascript
- React
- Bootstrap
- API
- GitHub

Functionalities provided by Online Movie Portal are as follows:

- Provides the search facilities based on various factors. Such as Movie name, Genre, Trending.
- Manage the information of different Genres.
- Shows the information and description of the Movie and Cast for any selected movie.
- To increase the efficiency of retrieving information for a movie.
- It also provides Log In facility for the user.

IMPLEMENTATION

Javascript is a scripting language used to enhance the functionality of the browser. Java script is integrated with HTML and navigator 2.02. JavaScript facilitates the developer with properties related to document windows, frames, loaded documents, and links.
